Grace at Hand

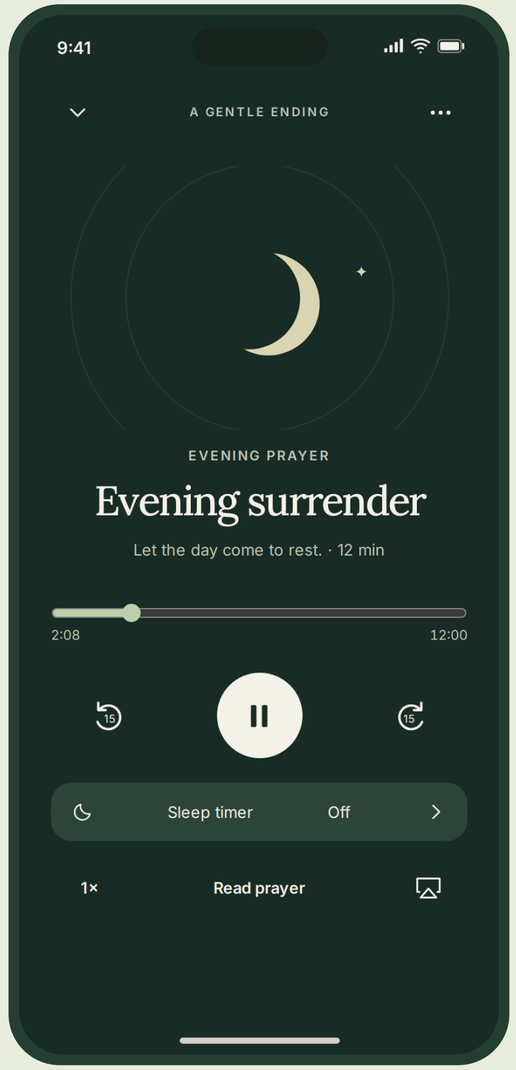

Daily prayer.
Freely shared.

A little space for God. A beautiful place to begin.

A warm, accessible Catholic prayer experience, built around clarity, privacy, and a generous free-access promise.

24 SCREENS & STATES

Visual system · Clickable prototype
Native implementation guidance

Quiet by design.

A Catholic-first identity with an inviting editorial layer and familiar platform behavior.

THE PALETTE

Warm ivory	Forest ink	Olive	Sage wash	Stone	Quiet gold
#F7F6F0	#253E32	#44634D	#E9ECDF	#DCDFD2	#977645

A VOICE FOR READING

Begin wherever you are.

Lora gives the concept a warm, devotional character. Inter keeps navigation, metadata, and controls clear. Production uses scalable native system text styles and a compatible system serif.

Morning offering

Prayer · 5 min · Text and audio

Prototype fonts are included under their OFL licenses. The app should use Apple platform typography through the native system APIs.

01 ## Clarity before abundance

One invitation to pray. A small number of stable destinations. Rich collections appear through discovery instead of competing on Today.

02 ## Warmth without pressure

Quiet imagery, human copy, and a gentle return path. Progress supports the person’s practice without ranking it.

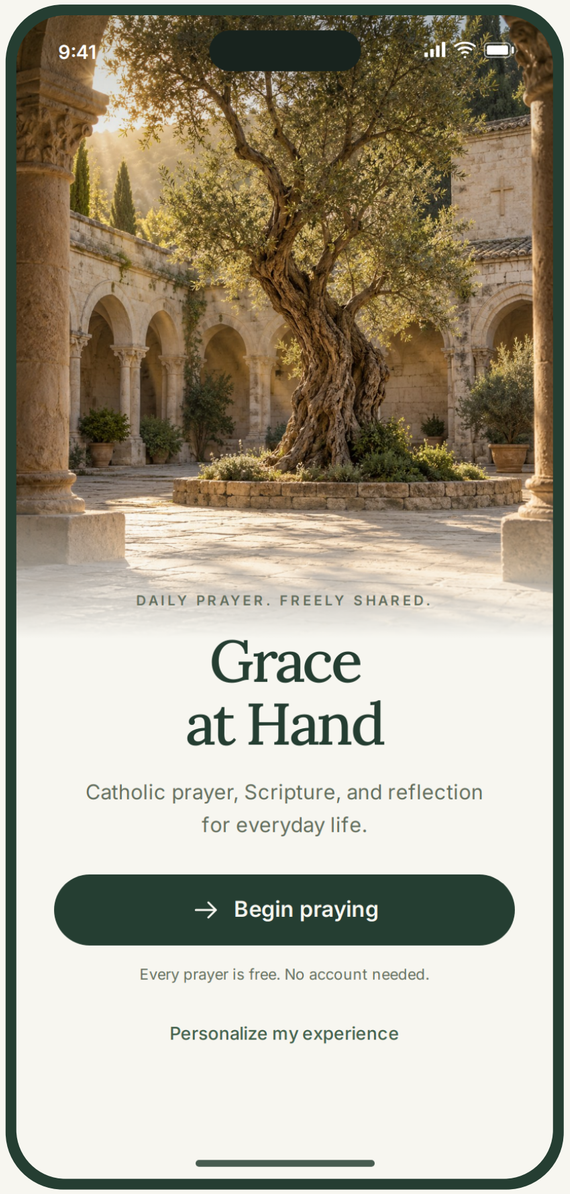

03 ## Visible boundaries

Downloaded, private, shared, and temporary states have explicit language and recoverable actions.

Design decisions: original concept. Platform references: Apple Typography [A5], Materials [A2]. Working name and identity require final clearance.

An invitation into prayer.

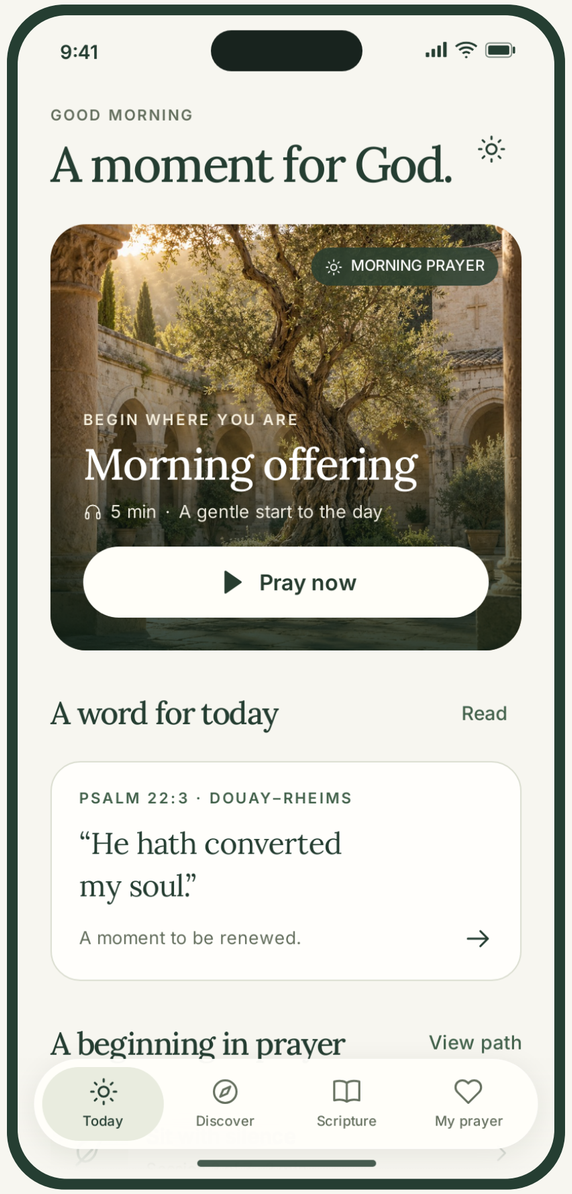

Guest access, one clear first action, and a library that feels welcoming.

01 / LAUNCH

Welcome

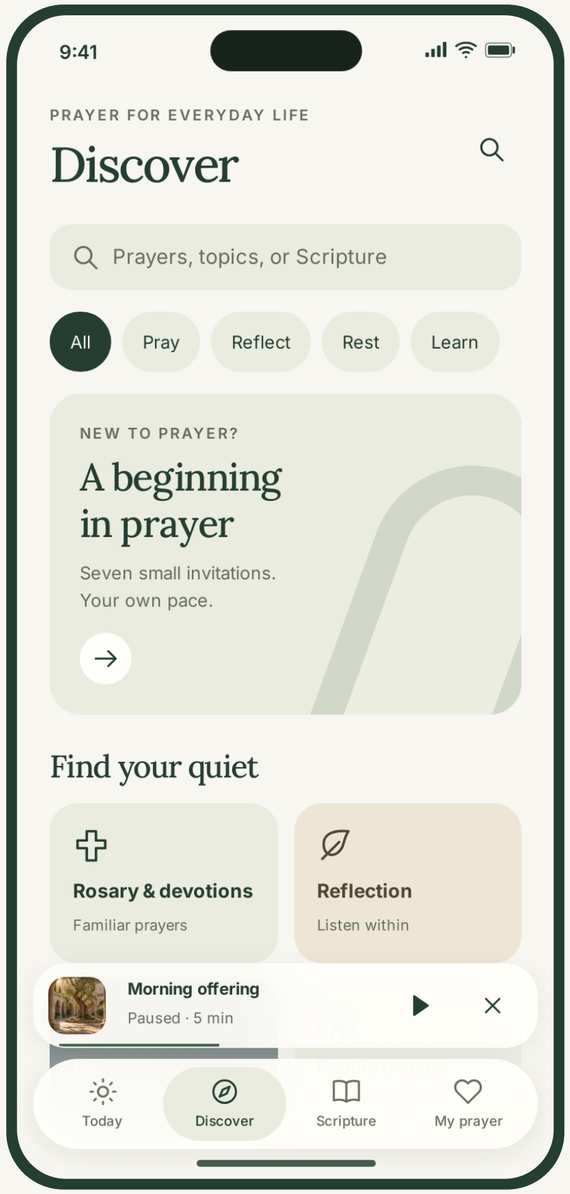

Begin immediately; personalization remains optional.

02 / LAUNCH

Today

A featured prayer leads. Scripture offers a quiet second step.

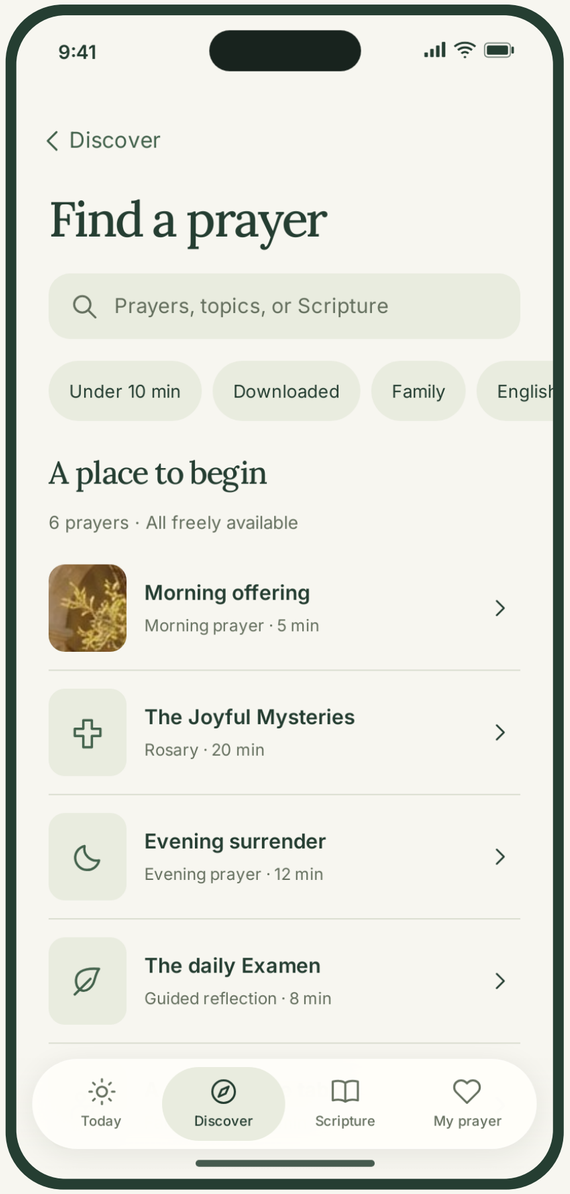

03 / LAUNCH

Discover

Collections expand access without crowding the daily flow.

From intention to listening.

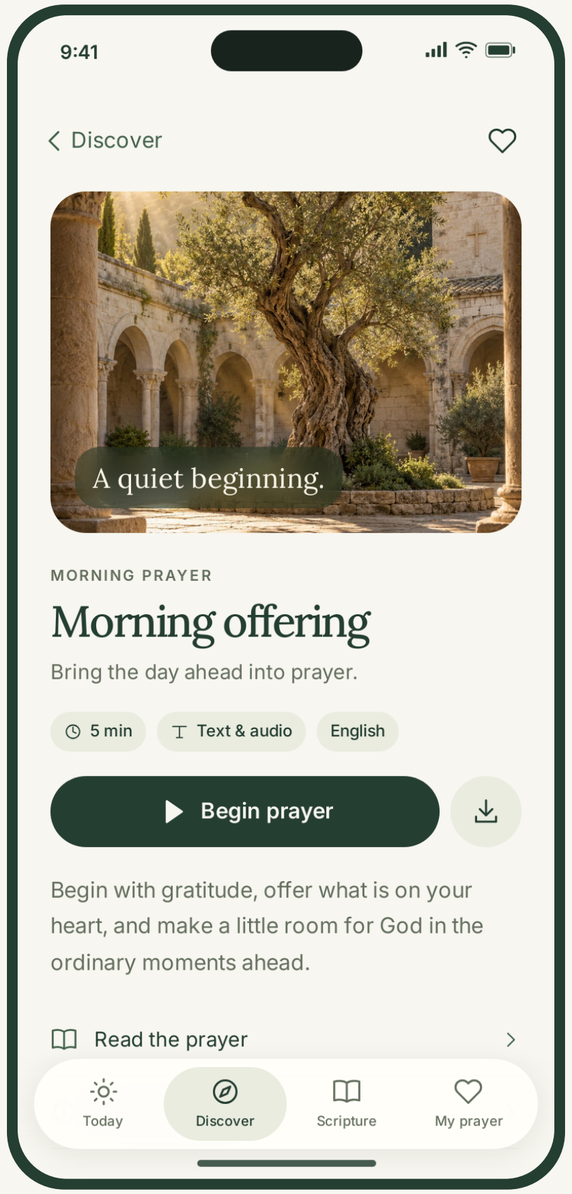

A short path from a need or topic to a complete, freely accessible prayer.

04 / LAUNCH

Search & filters

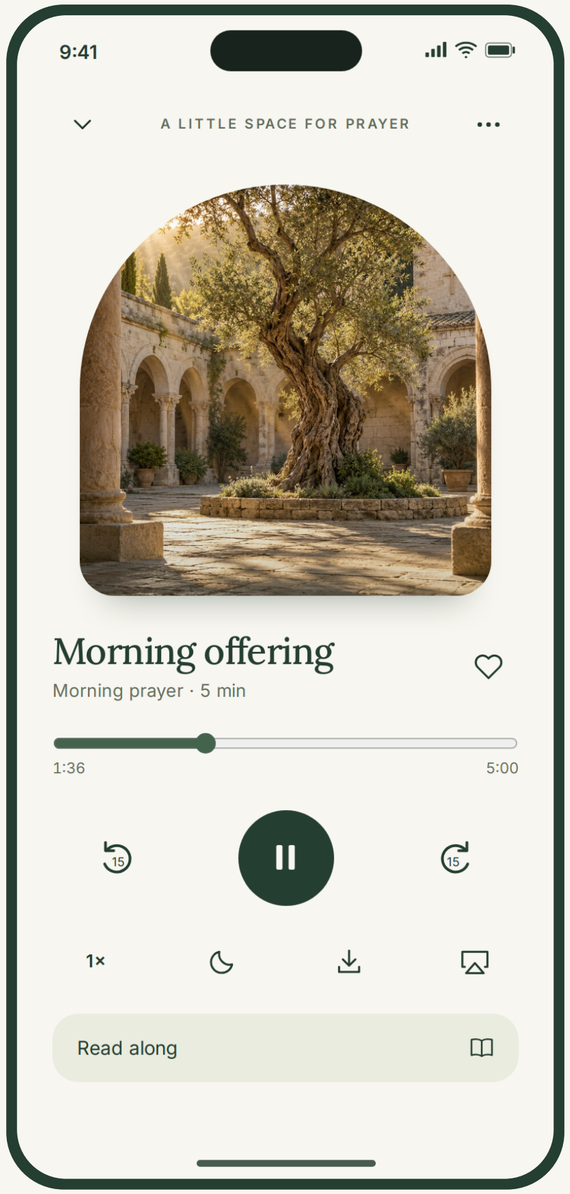

Query, duration, download, and family filters are reversible.

05 / LAUNCH

Prayer detail

Readable context, separate save/download actions, and credits.

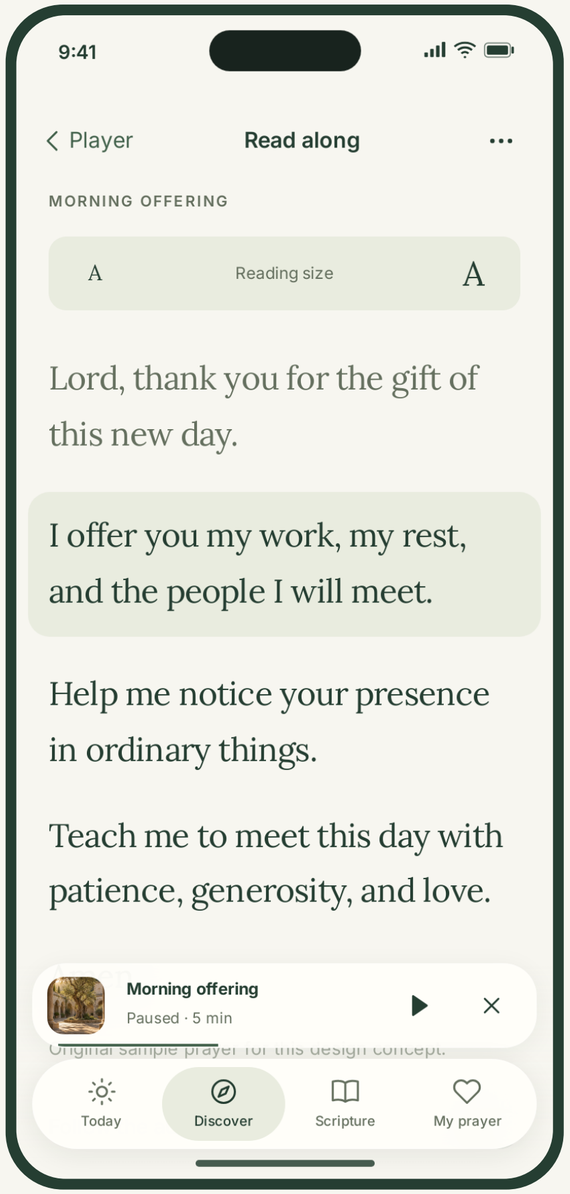

06 / LAUNCH

Full prayer player

Familiar controls, an optional timer, and one-tap text access.

Room to read. Room to listen.

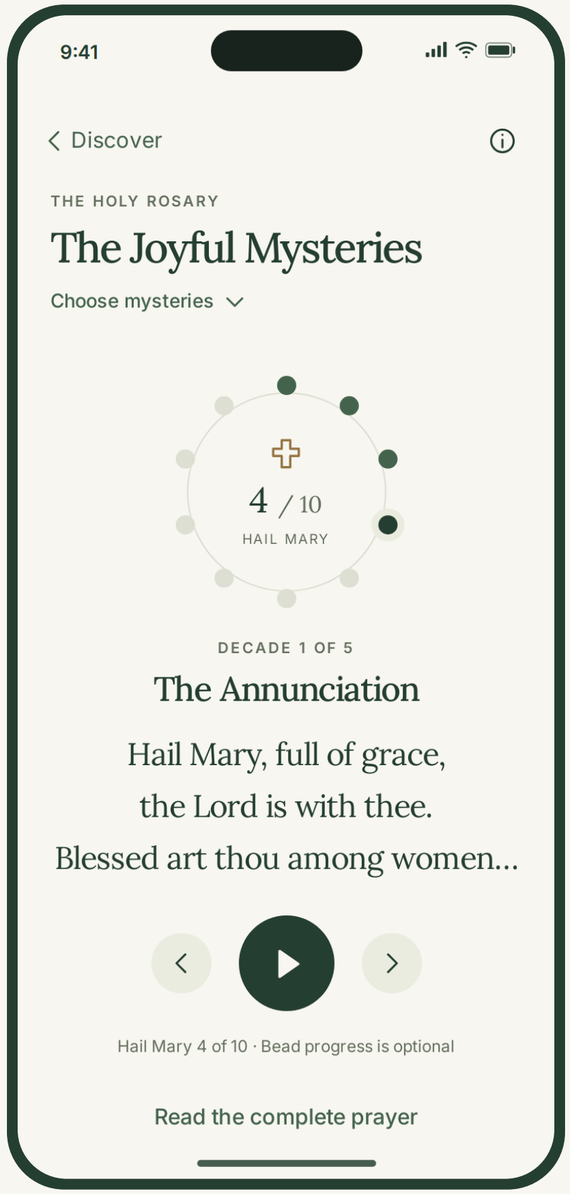

Text receives the same care as audio; devotional guidance stays easy to find.

07 / LAUNCH

Read along

Scalable text with optional paragraph-following emphasis.

08 / LAUNCH

Guided Rosary

Beads support explicit mystery, decade, and prayer counts.

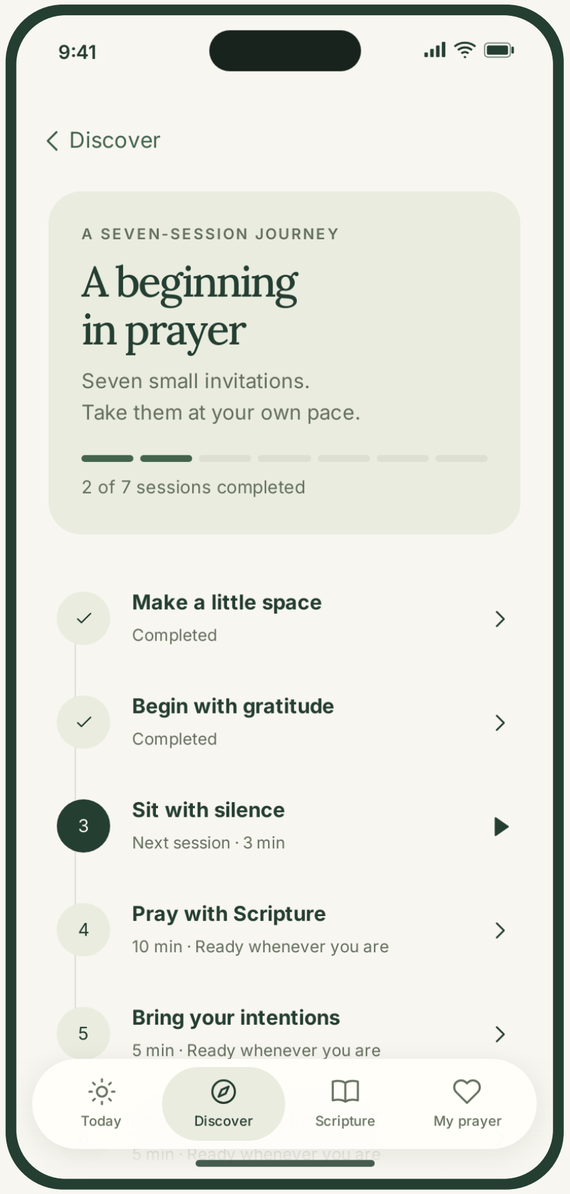

09 / LAUNCH

Daily Scripture

Translation and numbering stay close to the passage.

A practice that welcomes you back.

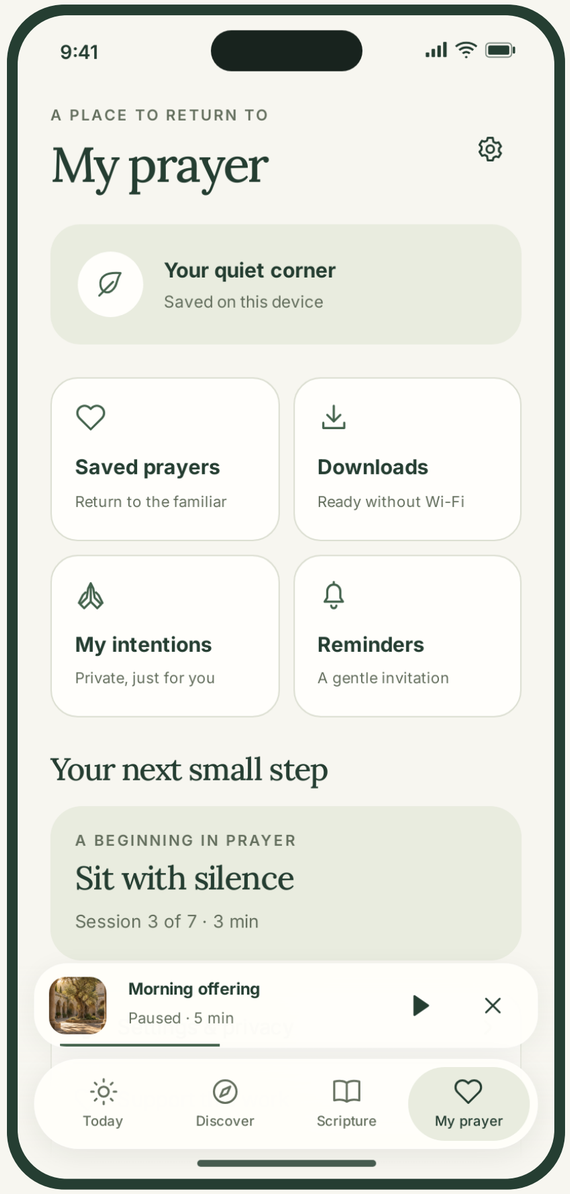

Continuity is personal, flexible, and useful without turning prayer into a score.

10 / LAUNCH

A beginning in prayer

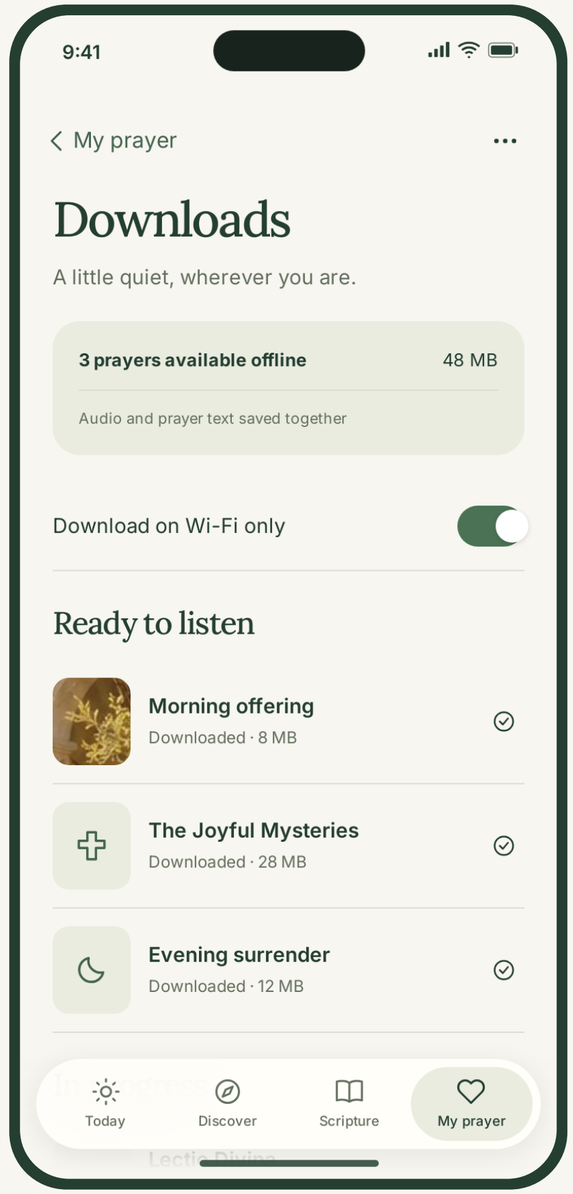

Seven sessions remain available at the person’s own pace.

11 / LAUNCH

My prayer

A dependable home for saved prayers, downloads, and intentions.

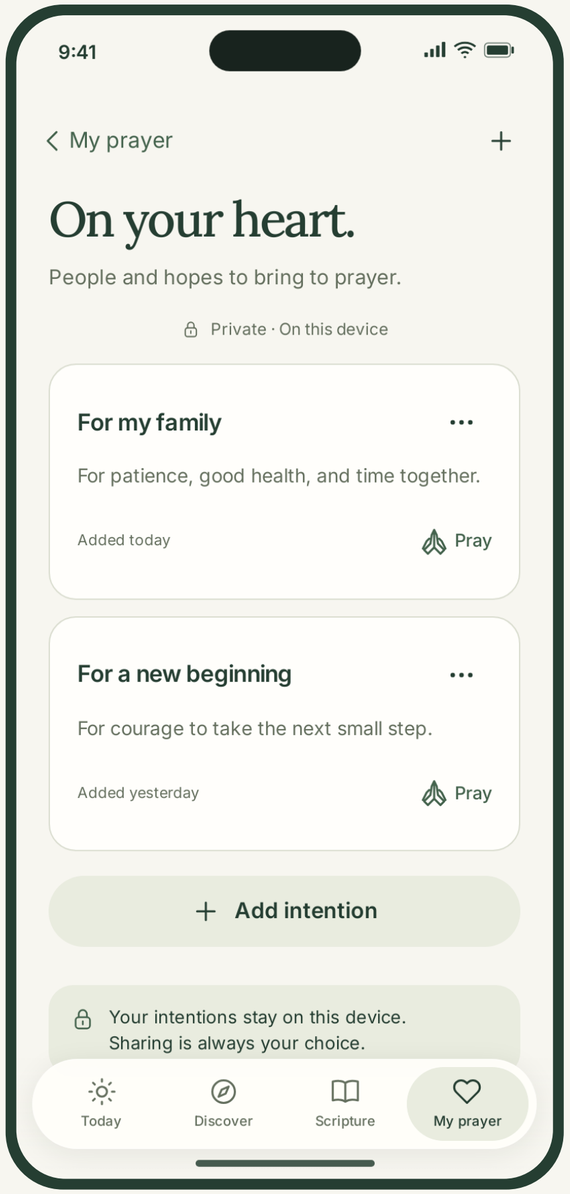

12 / LAUNCH

Downloads

Offline availability, transfer progress, and retry are explicit.

Private by default. Gentle by choice.

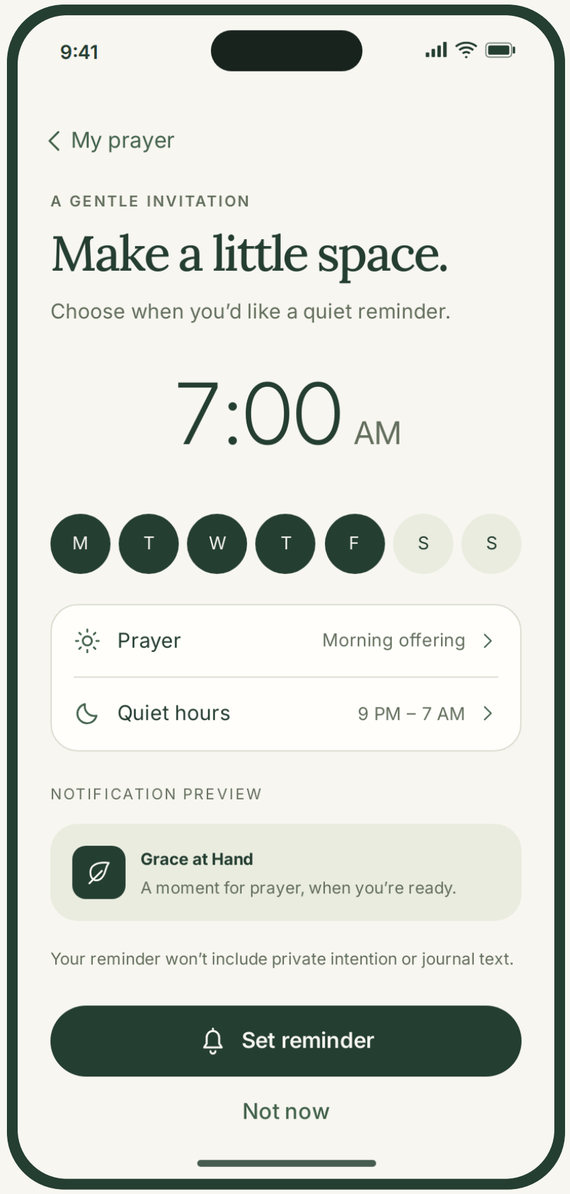

Clear local boundaries and considerate notification timing are part of the interface.

13 / LAUNCH

Private intentions

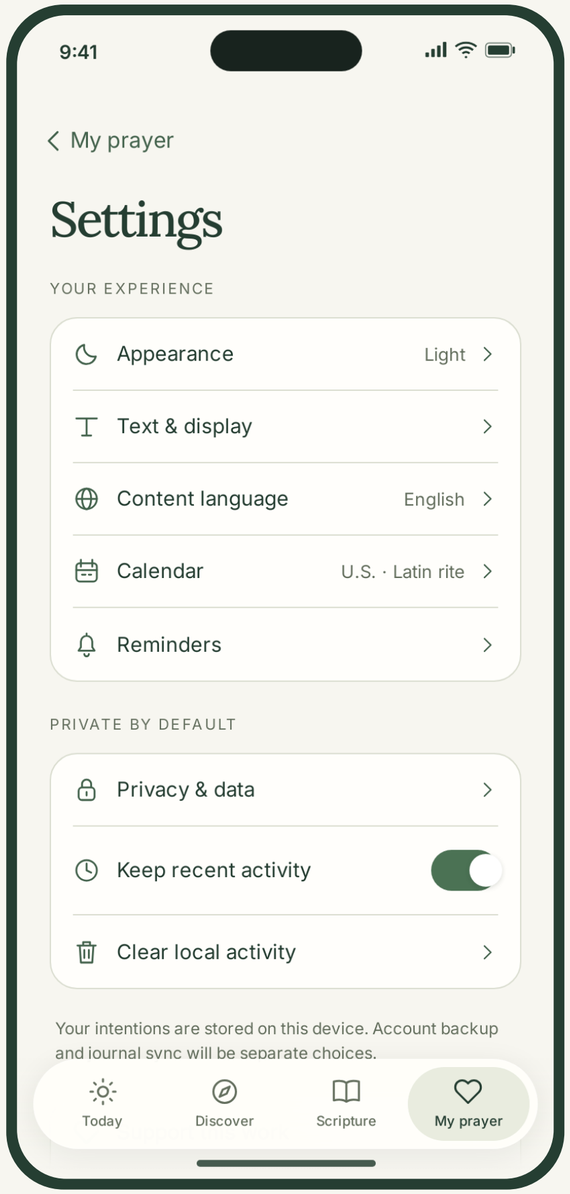

Add, edit, and delete without a forced account or sharing flow.

14 / LAUNCH

Gentle reminders

A time, chosen days, and a neutral notification preview.

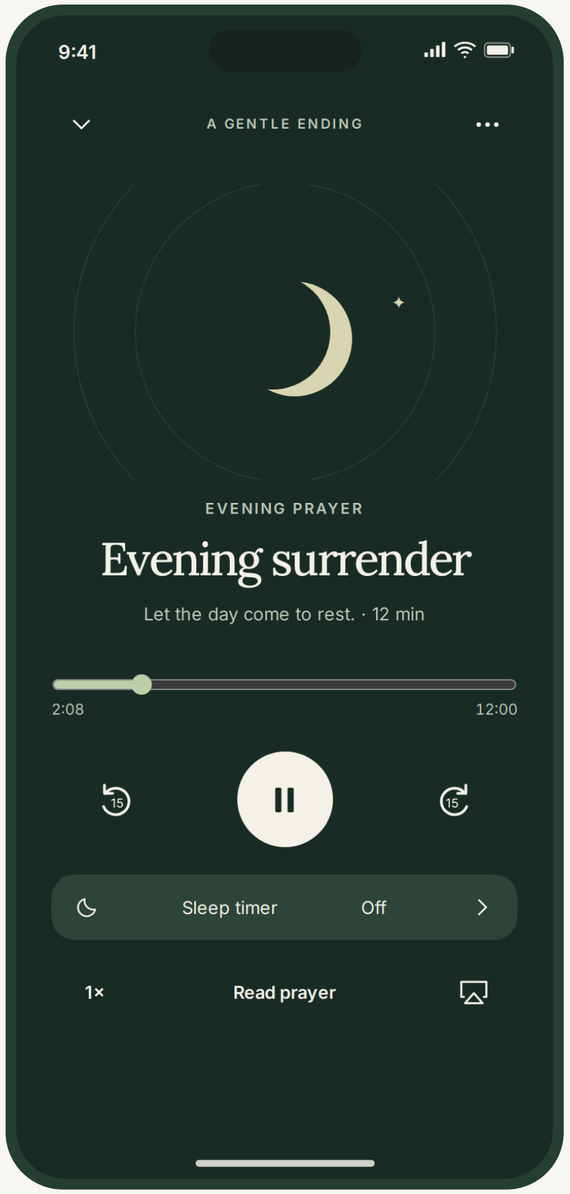

16 / LAUNCH

Settings & privacy

Appearance, supported content, privacy, and local controls.

Thoughtful beyond the ideal moment.

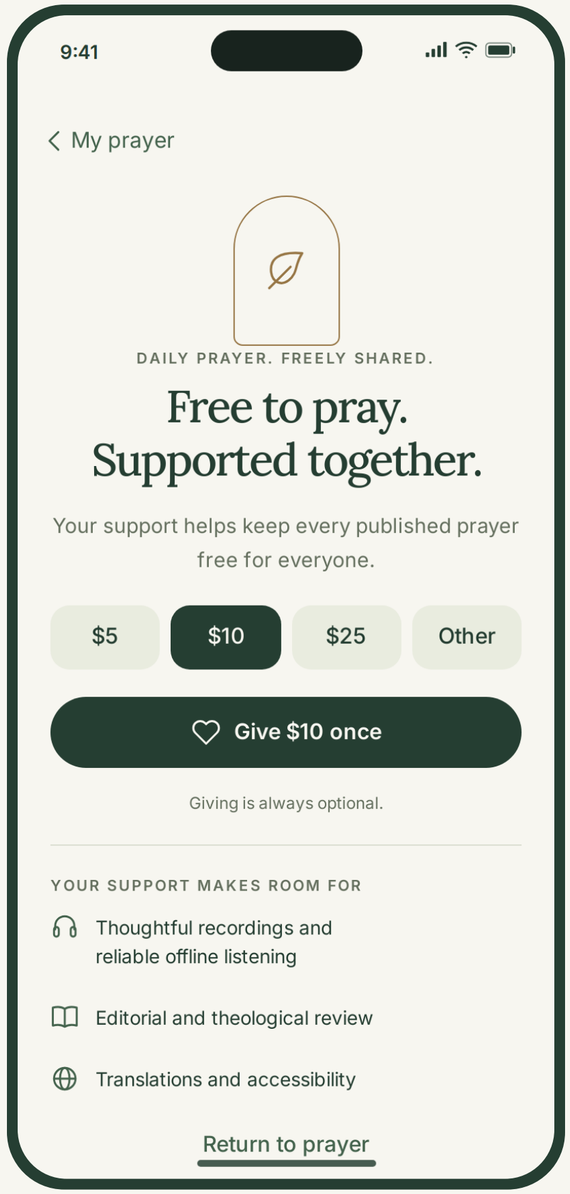

A designed dark appearance, optional giving, and honest offline recovery.

15 / LAUNCH

Evening prayer

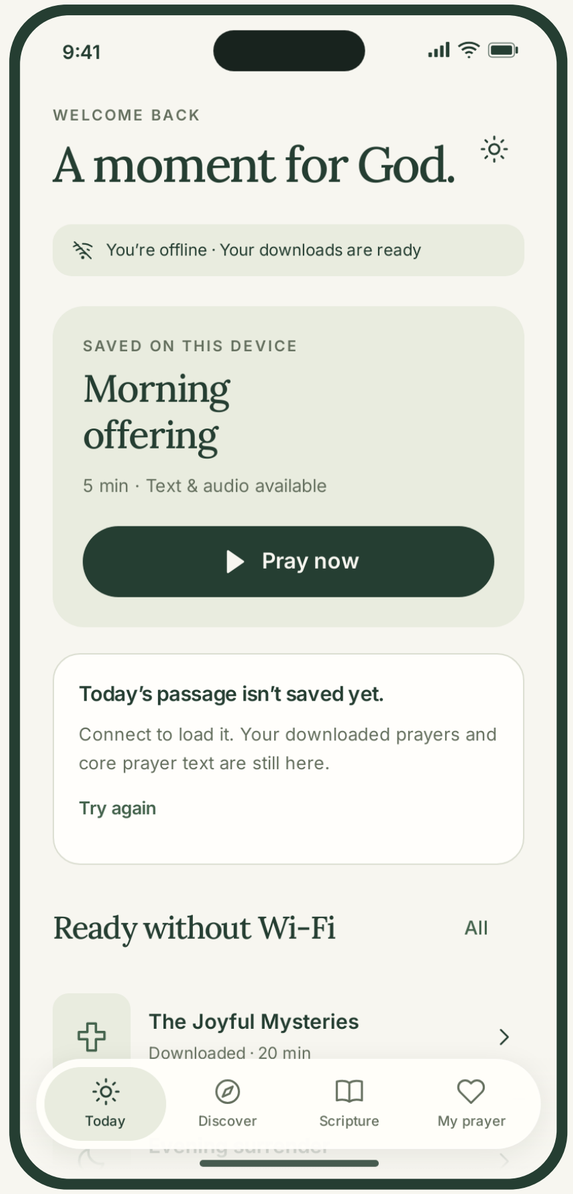

A matte forest surface, still illustration, and accessible timer.

17 / LAUNCH

Optional support

The free-access promise remains independent of giving.

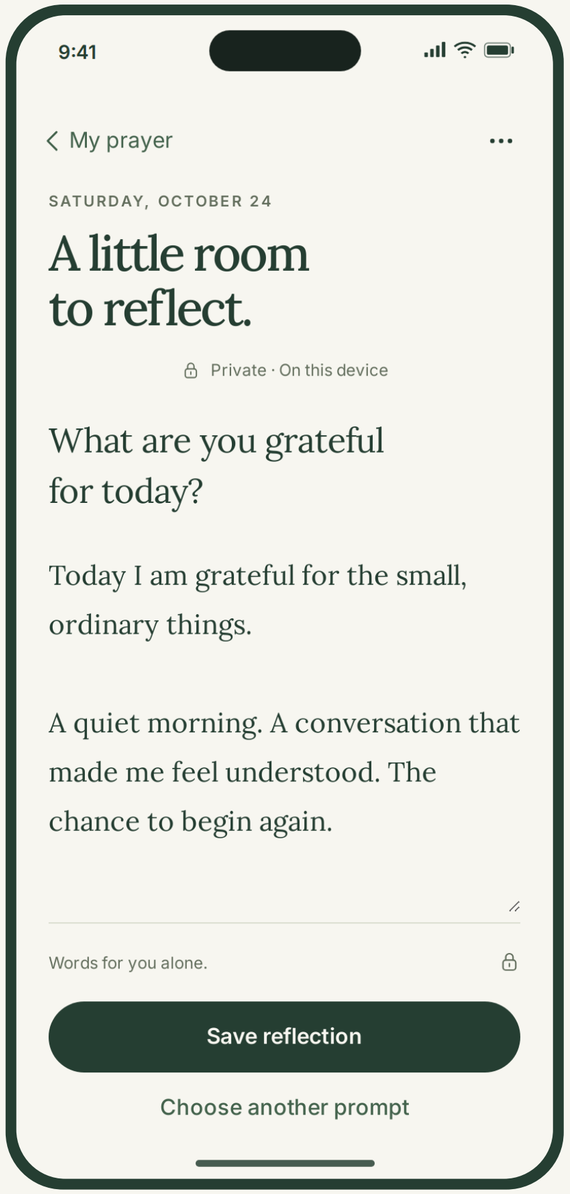

22 / LAUNCH STATE

Offline recovery

Downloaded prayer stays useful when fresh content cannot load.

More depth, with careful boundaries.

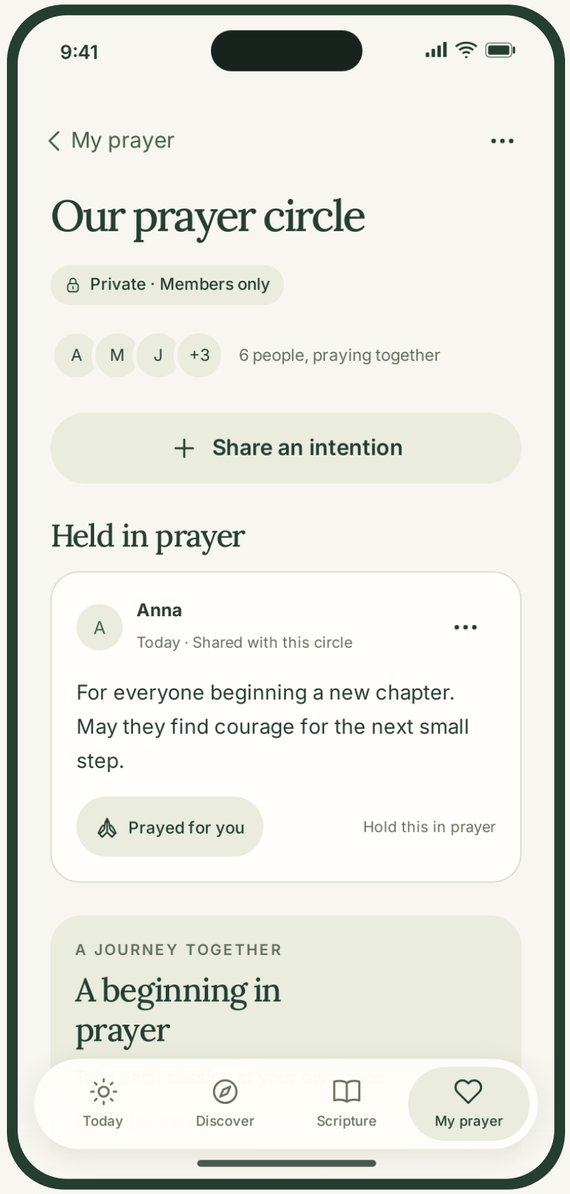

These expansion concepts are separate from the launch promise.

18 / NEXT

Prayer journal

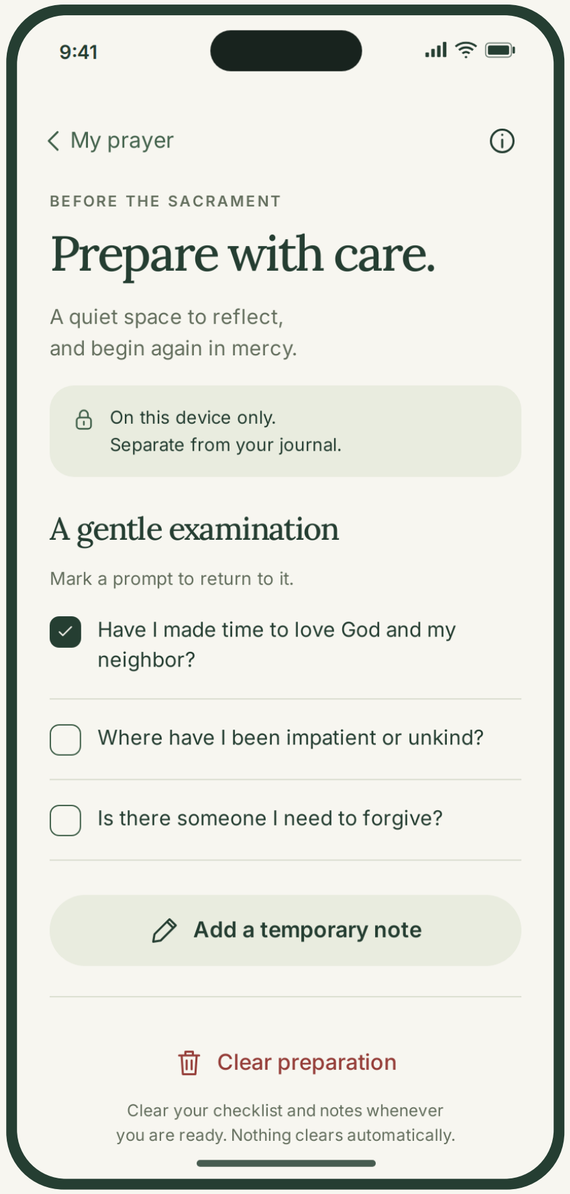

Private writing with an optional prompt; sync is a distinct choice.

19 / NEXT

Private prayer circle

A named audience and deliberate sharing, with member controls.

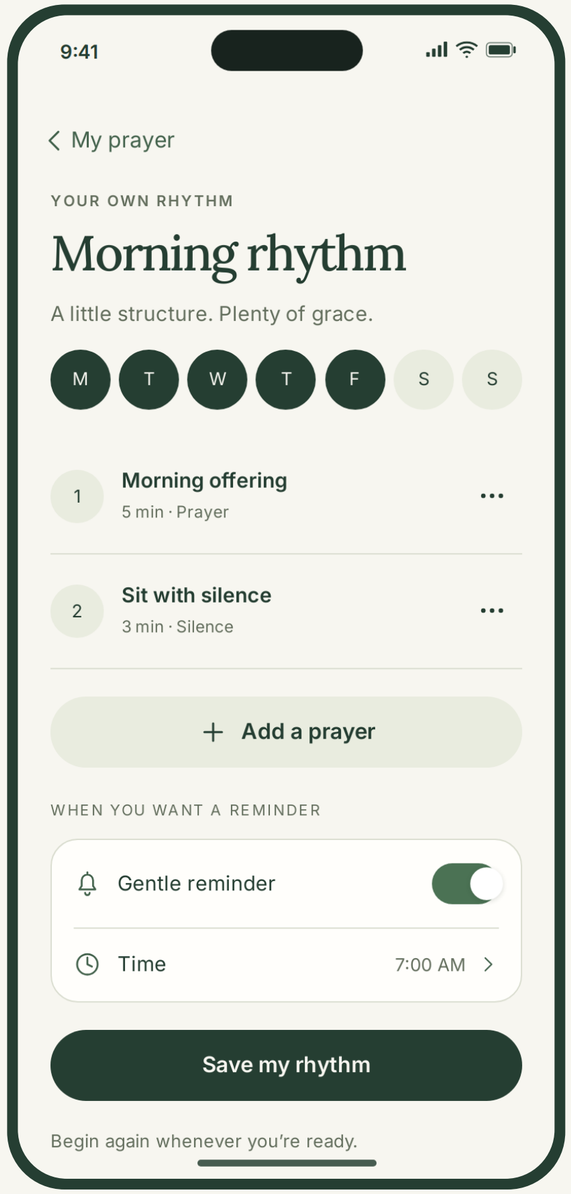

20 / NEXT

Confession preparation

Reviewed guidance and an explicit way to clear temporary notes.

Structure without pressure.

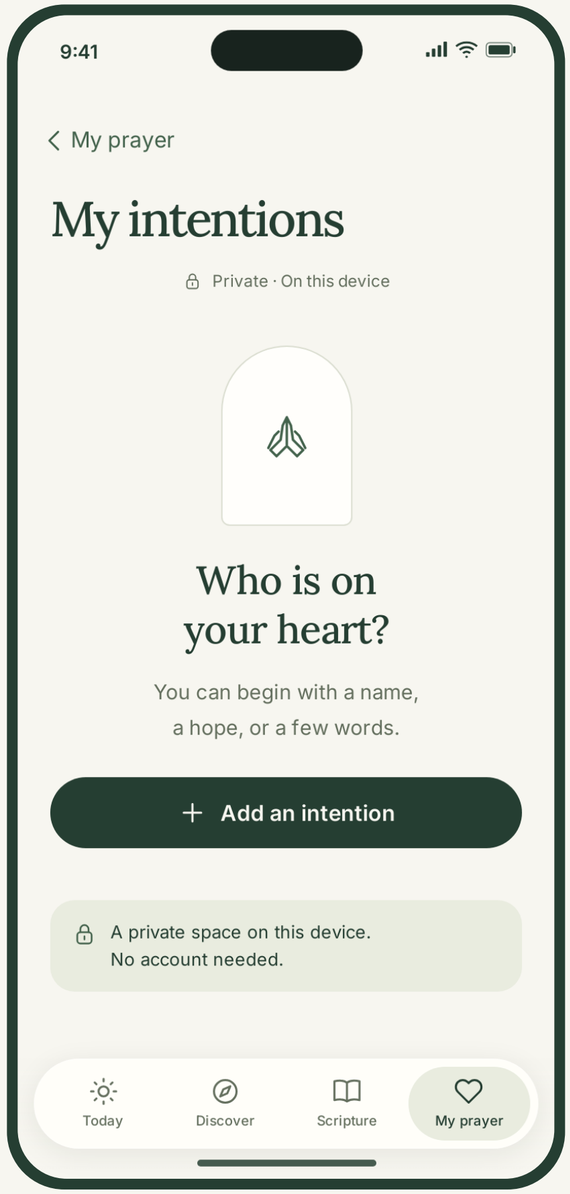

A future routine builder and a gentle first-use state share the same language of care.

21 / NEXT

Morning rhythm

Edit prayers, days, and reminders freely.

23 / LAUNCH STATE

Empty intentions

A name, a hope, or a few words is enough.

THE BEHAVIOR BEHIND THE BEAUTY

A routine is an invitation.

Let people pause, rearrange, and resume their rhythm. Avoid red missed-day indicators, forced catch-up, and spiritual achievement scores.

Empty spaces can be calm.

Explain what belongs in a space and provide one useful action. Keep genuine personal data out of first-use placeholders.

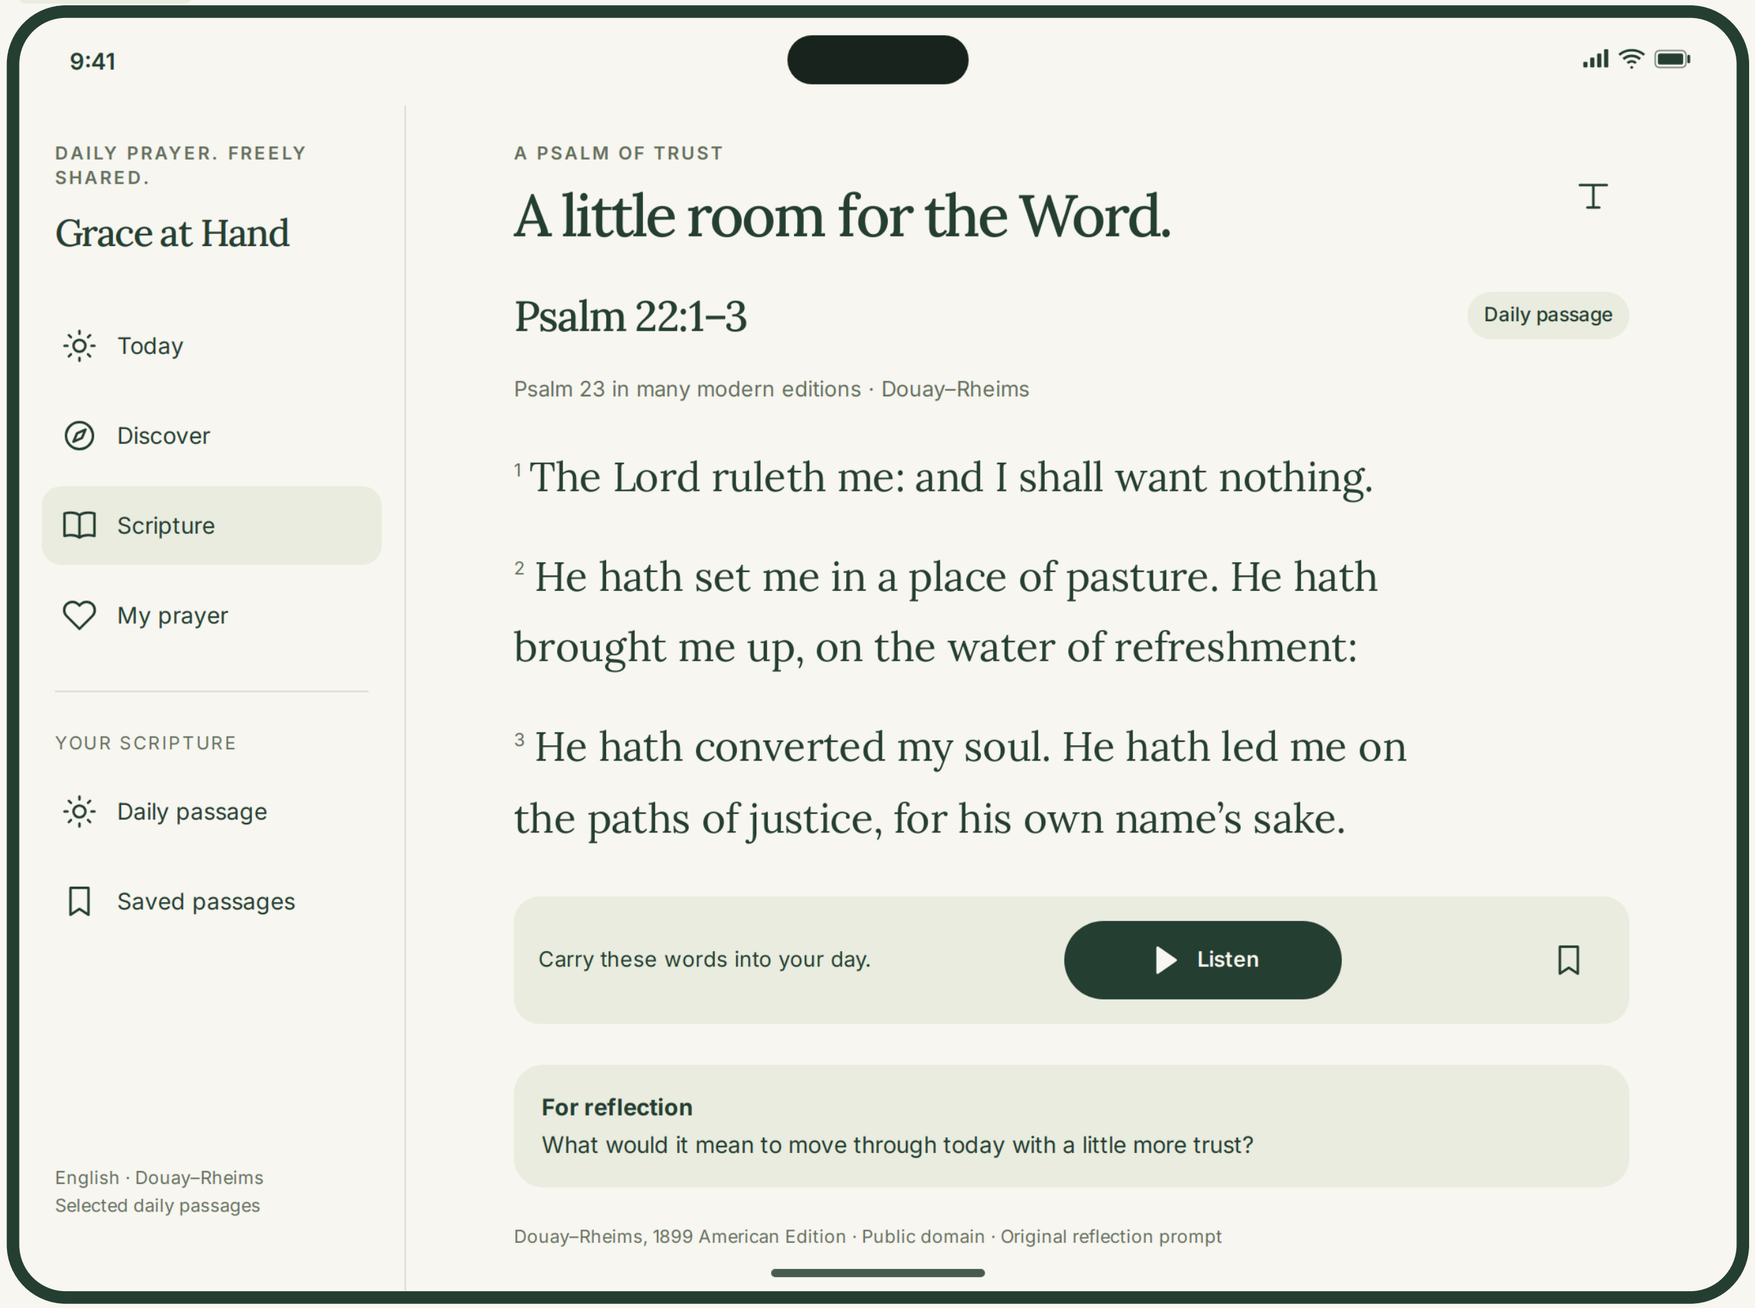

Consent has a moment.

Ask for notification permission after a reminder is chosen. Ask for sharing only after an audience is named. Keep both choices reversible.

A little more room for the Word.

The same destinations adapt to a sidebar, a bounded reading column, and contextual tools.

NEXT CONCEPT

Adaptive navigation

A stable sidebar gives each destination a clear home. Compact sizes return to the mobile navigation model.

Comfortable measure

Limit line length and retain generous leading. Reading tools sit near the passage without filling the page.

Real device work

Implement keyboard navigation, pointer behavior, window resizing, multitasking, and native accessibility.

Four destinations. One clear center.

Praying is an action within the content. Navigation is a stable way to find it.

DESTINATION	LAUNCH CONTENT	PRIMARY INTENT
Today	Featured prayer, selected daily passage, continuation	Begin now
Discover	Prayer, devotions, reflection, rest, family, beginner learning	Find a fitting prayer
Scripture	Selected daily passages and saved passages	Read, save, or listen
My prayer	Saved prayers, downloads, intentions, reminders, settings	Return to personal resources

01 The first-prayer path

Welcome → Begin praying → Today → Pray now → Player. Optional preferences can be skipped, and permissions do not interrupt this journey.

02 The return path

My prayer → Saved prayers or Downloads → Detail or Player. A saved favorite and a downloaded recording remain different states with different removal actions.

03 The persistent player

After listening begins, a compact player sits above the tab bar. The artwork and title reopen the current prayer; play/pause remains independently accessible.

04 Context stays intact

Native navigation stacks preserve position. Closing the player returns to the originating context. Sheets have clear dismissal and restore accessibility focus.

Platform references: Apple Tab bars [A1], Layout [A3], Playing audio [A6]. The web prototype demonstrates composition and selected state changes.

Small rules create a coherent whole.

Use semantic roles, reusable components, and platform foundations rather than screen-specific styling.

ROLE	REFERENCE	IMPLEMENTATION INTENT
Canvas / insets	393 × 852 · 24 pt margins	Adapt to actual safe areas, width, and text scale.
Spacing	4 / 8 / 12 / 16 / 20 / 24 / 32 / 40 / 48	Use tighter spacing within a group; more between groups.
Primary action	52 pt height · capsule	One strong action per context; allow content-driven height.
Touch target	44 × 44 pt project minimum	Larger target than the visible icon where needed.
Main playback	70 pt play/pause target	Conventional meaning, state, and accessible label.
Cards / sheets	20–26 pt cards · 30 pt sheet	Consistent family; native sheet geometry in production.
Body / reading	17 pt UI body · 23 pt reading reference	Use scalable native text styles; never fix reading height.
Section / display	26 pt section · 36 pt title reference	Editorial emphasis belongs to content, not every label.

Content is calm and opaque.

Prayer cards, transcripts, Scripture, and writing surfaces carry the reading experience.

Controls use native materials.

Tab bars, toolbars, and player accessories can adopt the system’s current glass treatment.

Design tokens are supplied as JSON. Source typography: Inter and Lora, OFL. Native references: Apple Materials [A2], Typography [A5].

Beauty that stays usable.

The reference screens are a design starting point; native behavior must be verified on supported devices.

01 Readable at larger sizes

Scale native text styles and let rows, buttons, sheets, and reading surfaces grow. Keep essential actions reachable at accessibility sizes.

02 Meaning beyond color

Pair selection, progress, and download state with text, icons, and announced values. Rosary progress has a written count.

03 Motion and materials

Respect Reduce Motion, Reduce Transparency, and Increase Contrast. Ambient artwork stays still; solid chrome is a supported state.

04 A predictable audio experience

Use native background audio, system routing, Now Playing, Lock Screen controls, and correct interruption recovery.

MEASURED BASE COLOR PAIRS

Aa	Light primary #253E32 on #F7F6F0	10.69:1
Aa	Light secondary #65705F on #F7F6F0	4.81:1
Aa	Light accent #44634D on #F7F6F0	6.18:1
Aa	Dark primary #F4F1E8 on #182B24	13.19:1
Aa	Dark secondary #BDC7B8 on #182B24	8.53:1

Ratios calculated from the supplied sRGB tokens. These checks do not establish whole-app accessibility: images, transparency, component states, focus order, assistive technology, and native text scaling still require validation.

The 44 pt target is this project’s chosen minimum. It should not be described as a universal absolute rule for every Apple control.

Platform references: Apple Accessibility [A4], Typography [A5], Playing audio [A6]. Native VoiceOver and Dynamic Type have not been tested by a web prototype.

Every interruption has a useful next step.

Design recovery alongside the successful flow. Preserve the person’s place and the available text.

STATE	SUGGESTED COPY	NEXT ACTION
No saved prayers	A familiar prayer, close at hand. Save any prayer to find it here.	Explore prayers
No intentions	You can begin with a name, a hope, or a few words.	Add an intention
No downloads	Bring a little quiet with you. Download a prayer to listen offline.	Find a prayer
Offline / fresh passage unavailable	Today’s passage isn’t saved yet. Your downloaded prayers are still here.	Open downloads
Audio unavailable	This prayer couldn’t load. You can still read the text.	Try again / Read prayer
Playback interrupted	Playback paused. Your place is saved.	Resume
Download interrupted	Connection lost. Try again when you’re connected.	Retry download
Insufficient device space	There isn’t enough space for this download.	Manage downloads
No search results	No prayers found. Try fewer words or another topic.	Clear search & filters
Notifications denied	Reminders are off. You can enable them in Settings.	Open Settings
Returning after a break	Welcome back. Begin wherever you are.	Pray now

Show readable equivalents while media loads; do not trap someone behind an indefinite spinner. Label older cached passages by their actual dates. Failed downloads never remove a saved favorite.

A small launch, with room to grow.

All 18 areas in the source brief have a design home or an explicit operational responsibility.

FEATURE AREA	DESIGN HOME	SCOPE / RESPONSIBILITY
Getting started / accounts	Welcome and Settings	Guest at Launch; accounts and migration Next
Today / discovery	Today, Discover, Search	Personalization expands Next
Prayers / devotions	Detail, Rosary, guided text	Core catalog Launch; more devotions Next
Guided reflection	Player, Transcript, Path	Lectio, Examen, silence, authored durations
Scripture / calendar	Scripture and Settings	Daily passage Launch; full reader / Mass readings Next
Learning / journeys	Beginner Path	Foundations, saints, seasonal journeys Next
Audio / offline	Player, Transcript, Downloads, Offline	Native audio and resilient delivery at Launch
Sleep / sacred music	Evening player, Rest collection	Small bedtime catalog Launch; licensed expansion later
Routines / progress	Reminder, Routine concept	Reminders Launch; routine builder Next
Journal / intentions	Intentions, Journal concept	Local intentions Launch; journal / export / sync Next
Confession preparation	Confession concept	Next; reviewed prompts and clear retention
Families / children	Family collection and suitability labels	Starter prayer Launch; adult-managed profiles Next
Communities / parishes	Private Circle concept	Circles Next; public communities / parish services Later
Accessibility / languages	All screens; tablet concept	Accessible mobile Launch; languages and tablet Next
Privacy / controls	Settings, local labels, deletion	Private defaults Launch; granular sync/sharing Next
Editorial / content	CMS and review operations	Reviewed scripts, credits, rights, calendar ownership
Reliability / support	Help, recovery states, operations	Monitoring, backups, staff roles, release recovery
Funding / stewardship	Optional Support	Giving Launch; recurring support and reporting Next

Scope source: supplied feature brief. Later parish, public-community, AI-search, and device-integration experiences are not represented as launch promises.

The interface needs a trustworthy foundation.

Editorial quality, privacy, and delivery are product requirements, not decorative labels.

01 Publish a complete content record

Each session needs a stable ID, title, language, format, duration, suitability, script, transcript, media files, artwork, credits, version, and availability. Real duration variants must be separately authored or recorded.

02 Review before publication

Use draft, editorial review, theological review, permission review, media checks, transcript/accessibility checks, then publication. Assign named ownership to calendars, corrections, and withdrawals.

03 Make rights explicit

Track rights to text, recordings, music, images, translations, territories, versions, expiry, and offline delivery. Keep a visible source credit near Scripture. The sample passage is sourced, not an unlabeled paraphrase.

04 Keep private data separate

Intentions are local by default. Journal sync needs separate consent. Shared intentions require a selected audience. Confession preparation is separate from journal and account history, with a prominent clear action.

05 Operate community before scaling it

Before private circles launch, define membership, invitations, visibility, removal, reporting, blocking, moderation ownership, and response handling. Public communities and parish information require more ongoing support.

06 Let giving support access

Contributions do not unlock prayer. Explain recipient, amount, currency, and frequency before payment. Keep requests outside playback and sensitive writing or preparation moments.

Product boundaries derive from the supplied brief. Platform reference: Apple Privacy [A7]. Scripture reference: Douay–Rheims sample [S1].

Ready for the next design conversation.

The package contains the visual decisions, source files, and representative interactions needed for the next design pass.

WHAT IS INCLUDED

24 screens and states

23 phone views plus an iPad Scripture concept, exported at high resolution.

A clickable local prototype

Navigation, search/filtering, player controls, reading sizes, intention editing, selected reminder states, and more.

An editable visual system

HTML/CSS/JavaScript source, semantic design tokens, original artwork, licensed fonts, and a 3,000+ word design guide.

IMPLEMENTATION CHECKS

Guest start · Airplane-mode listening · Download recovery · Audio interruptions · VoiceOver focus · Dynamic Type · Light and dark appearances · Sensitive-data boundaries · Content review · Clear deletion and sharing.

THE PROTOTYPE'S BOUNDARY

This is a design prototype, not a production iOS app or an App Store approval claim. Audio playback, downloads, notification permission, giving, invitations, secure storage, and background behavior are visual simulations. Demo writing lives only in the page session and clears on reload.

REVIEW BEFORE BUILDING

Confirm the working name, supported OS versions, initial region and rite, reviewed content and translations, guest storage behavior, account/sync roadmap, donation provider, and editorial ownership.

HOW TO EXPLORE

Open the HTML prototype in a browser. Select a screen from the left rail, tap the app's controls, or switch appearance. Reset demo clears temporary sample state. Next concepts are labeled in the screen library.

Native iOS should use platform components and real device behavior. The prototype establishes visual and interaction intent.

Sources and design provenance.
